

# How to Transpose Music Easily using Transposing Graph

## How to Transpose Music Easily from one Key to Another. The Easy Transposer

Transposing music and finding it difficult? You can transpose music or keys easily with this music/key map. Simply find the musical key you are currently using in the central blue column and then move left or right to transpose and find the destination key. **For Example** : If you are in the Key of C and you want to know how to transpose up by 4. Semitones simply move right by 4 columns until you reach E. All Entries in This column will relate back to the central column. Therefore, if the chords in the piece were C, Em, Am and C and then you transposed up by 4 semitones the result would be E, G#m, C#m and B.
